Carpool Easy:

Team Name: LadyLogicTrio

Steps to Run

The following are the sequence of steps required to run the Carpool Easy Application:

1. Unzip the Folder

 2. Run the main.java file

3. The Login page will be displayed. To enter the Login Page using existing credentials, Enter the **Username**: admin and **Password**: admin

4. To add a new user on the application, click on Signup, fill all the required details and select the role

- If the role is "Rider" click on submit button. It will be redirected to the login page.
- If the role is "CarOwner" fill in the required details and submit. It will be redirected to the login page.
- If the role is "Driver" fill in the required details and submit. It will be redirected to the login page.

5. Once the user login, according to the roles user can use the application:

- If the role is "**Ride**r", user can "**find a ride**" with the required details on the page. According to the user requirements, the user can cancel or proceed with the payment.
- If the role either "**CarOwner**" or "**Drive**r", user can "**offer a ride** "or "**find a ride.**"
    - ➢ Choosing "offer a ride" user should the trip requirements and publish it.
    - ➢ Choosing "find a ride" is same as a rider role mentioned above.

Note:

- ➢ Added three images to the source file that we used for the application.
- ➢ Additionally, we have added database schema (MY SQL Workbench) that we used for our application.
    - ▪ Database username: root
    - ▪ Password: reset@123
